

Policy of the Board of Directors

ROUNDING UP FOR OUR COMMUNITY PROGRAM POLICY

General Policy Statement

The District intends for the Rounding Up for Our Community program to augment existing funding for Energy Net (low-income) customers through direct voluntary customer donations. Customers that voluntarily participate will have their energy bill charges rounded up to the next even dollar amount. The extra cents collected each month will be used to augment other funding for Energy Net.

Eligibility

All customers are eligible to participate. Customers can sign up via a bill stuffer form, in person, or by telephone.

Program

Participating customers will receive an additional line item on their monthly energy bill indicating the amount of their contribution. The billing statements mailed in January will also contain a yearly contribution total.

If funds received from a customer is less than the total amount due; all funds received will first be used to pay for all charges other than the Rounding Up amount and the customer will be deleted from the program. Otherwise, participating customers will continuously remain on the program until the customer requests to be deleted from the program.

The amount of additional funding received from the Policy will be added to, and not supplement funds otherwise transferred to, the Energy Net program.

Richard Adkins, President
