

#### BACKGROUND

- TPUD began delivering power to Weaverville in 1982 taking advantage of the 1955 Trinity River Division Act that set aside 25% of the power generated from Trinity River water for "the use of the citizens of Trinity County"
- TPUD has a "first preference" right to purchase power from the Western Area Power Administration (WAPA)
- TPUD's first preference power satisfies California's renewable power mandate under SB100
- In 1993 TPUD purchased powerline and substation assets from PG&E allowing the PUD to provide power to the areas outside of Weaverville expanding to the current service area.

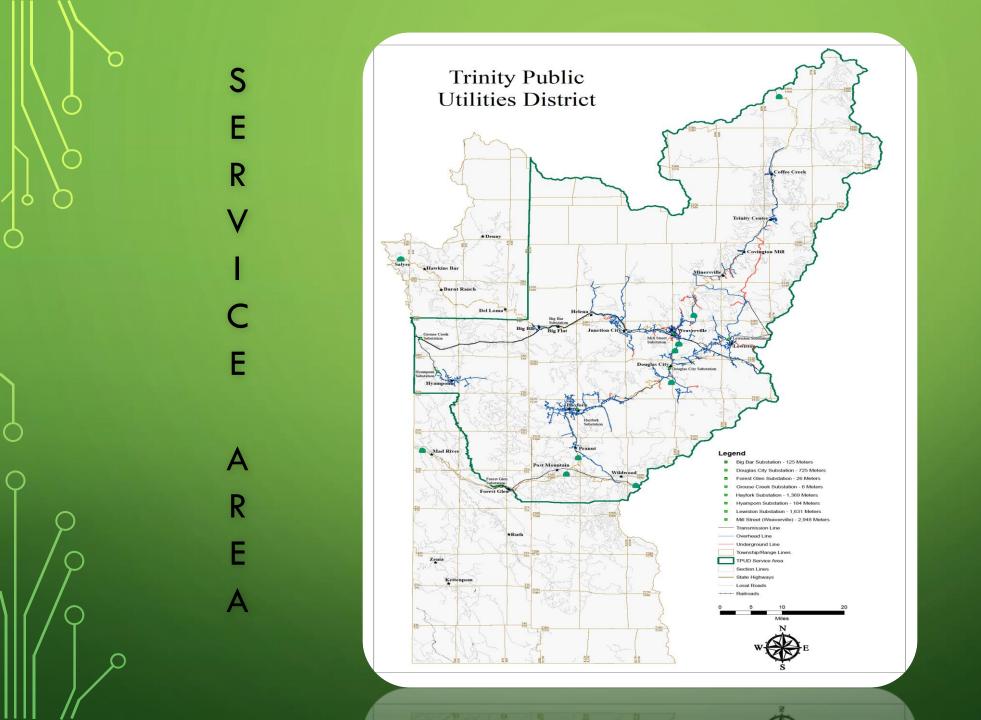

#### MORE..

• Today TPUD has 25 employees that provide electric service to 7,282 customers located over a 2,200 square mile service territory

• The PUD has 9 substations and more than 700 miles of power lines

• 94% of the power is delivered over WAPA and TPUD transmission lines with the remaining 6% delivered from PG&E transmission lines

 All of the power is renewable, emission free hydropower from the Central Valley Project

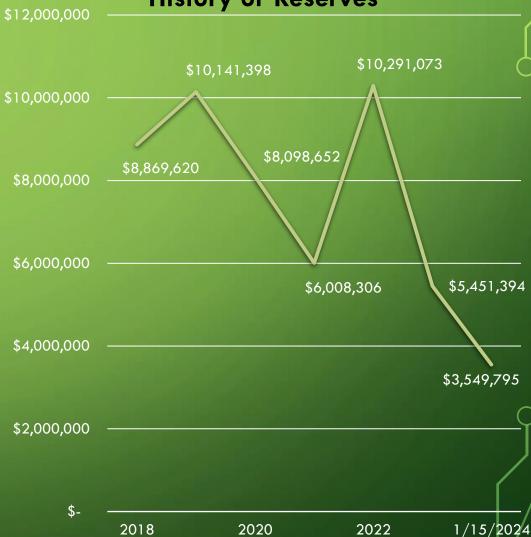

#### 2024 RATE RESTRUCTURE

- In February 2023, the District implemented a 4-year rate restructure. In February 2024, the District accelerated years 3 and 4 into year 2 resulting in equalized rates over each rate class;
- The Drought Relief Surcharge was replaced with a Wholesale Power Charge which was intended to recover wholesale power costs in a more timely manner

#### **RESERVES HISTORY**

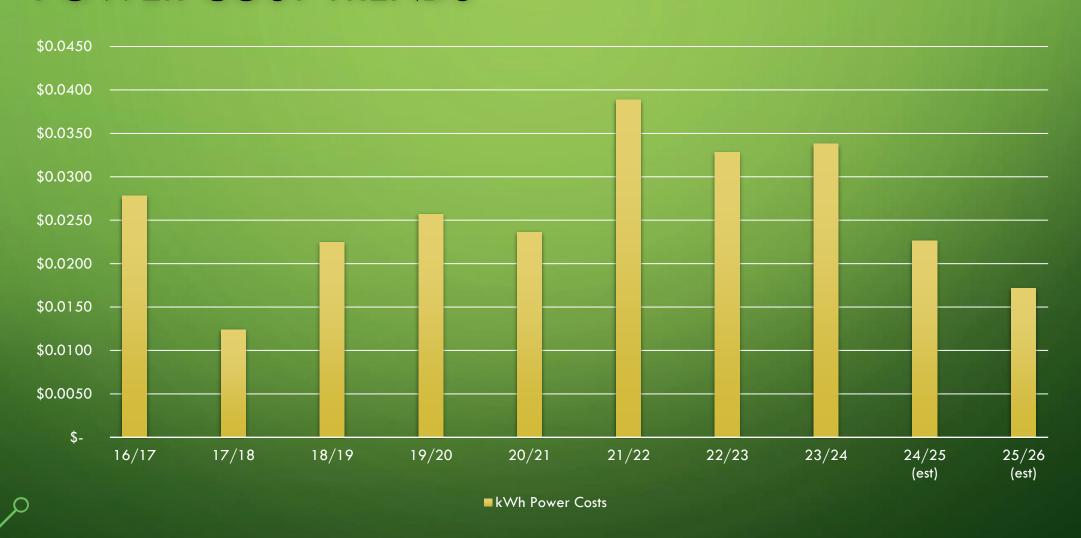

- Reserves began to decline in 2019 as capital expenditures increased
- Increased cost for vegetation management
- ROW Expansion Project
- Capital Investments to upgrade the system to Serve New Load - \$15 million to date
- Borrowed \$9.0 million in 2021 for system upgrades
- Helena Fire settlement = Loss of wildfire liability insurance
- Proactive rate restructure and revenue increase in 2024

-Reserves

#### POWER COST TRENDS

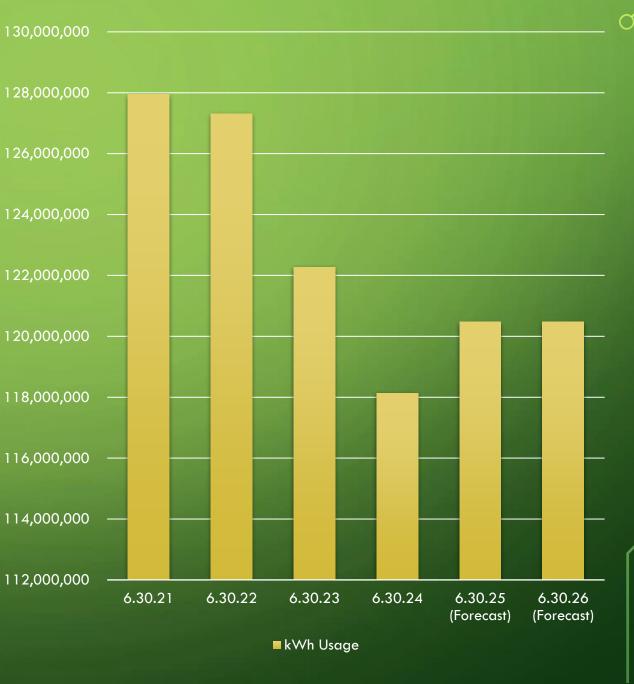

#### **POWER SALES**

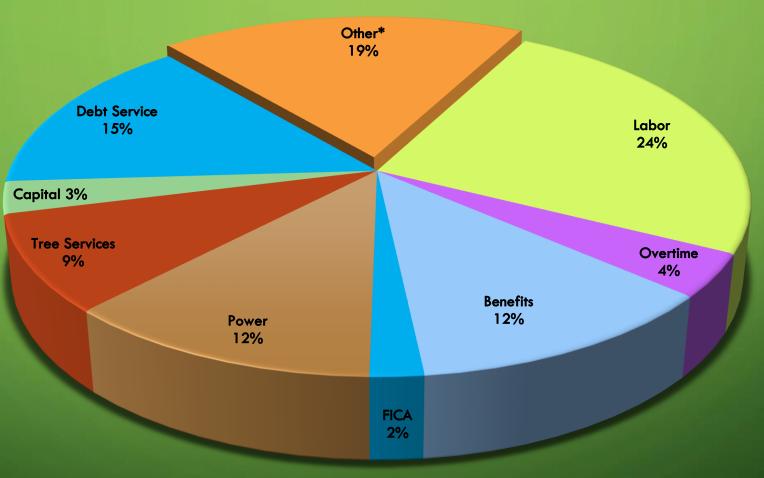

TPUD has lost load since 2021

 All of the load loss is in the High Impact and Commercial categories

 Residential load has increased slightly
